## Coral Nursery

This is your chance to add an aspect of conservation to your holiday; to give something back to the Maldives.

We have beautiful coral around Anantara but unfortunately, due to its fragile nature, it is easily broken by people as they accidentally get too close while enjoying our stunning lagoon. At the Coral Nursery on Anantara Dhigu, broken pieces of live coral are transplanted into new homes and thus given a new lease of life.

The marine biologist will let you in on the secrets of what coral truly is as you get as close as you have ever been to live coral fragments. Adopt a coral, give it a name then transplant it into its new home.

The presentation is suitable for all ages and best of all, it is complimentary!

- Only NO decompression diving

- Open Water Divers or equivalent have a maximum depth of 20 metres

If you don’t have dive insurance, we suggest DAN Maldives temporary insurance for peace of mind

Diving in the Maldives is exciting, but currents can be strong! Please listen to our guides and dive conservatively and within your limits

## Eco Diving

We have a resident Marine Biologist, who is also an experienced PADI Divemaster, poised and ready to help you to learn more about the underwater world. Want to know your butterflyfish from your angelfish, or be the only diver on the boat who knows that the large table coral you saw is called *Acropora*? Learn to identify some of the fish and coral species of the Maldives by going on fish-spotting and coral-spotting dives.

What's more, in conjunction with the Marine Conservation Society of the UK and the Marine Research Centre of the Maldives, AQUAFANATICS is participating in Fishwatch Maldives survey dives, and you can to.

This is an easy way to give something back to the reefs; all you have to do is count fish!

## What is Fishwatch Maldives?

Fishwatch Maldives is a nationwide recording scheme for reef species fished for food and for the aquarium export trade. The data collected by divers all over the Maldives provides information on distribution, abundance and size of key species.

The results will be combined with fishery data and used to produce much-needed fishery management plans, which will help to sustain the fish populations of the Maldives.

Take part in a survey dive and get a Fishwatch Maldives stamp in your logbook!
